

GEOG 213 : Introductory Geography

ACTS Equivalent Course Number GEOG 1103

Lecture Hours 3

Credits 3

Introductory Geography, GEOG 213 (GEOG 1103), is a survey of the physical and cultural characteristics of the world environment. The course examines the inter-relationships between humankind and the physical world through the student's understanding of maps, terms, devices and methods employed by geographers in their study of people and places.
